

## Honey Bee Packet - \$20

(4 each of the following species - 20 seedlings total - No Substitutions) These species will benefit many of our native pollinators by providing early season to late season blooms.

### Eastern Redbud (*Cercis canadensis*)

This deciduous, often multi-trunked tree has a rounded crown and typically matures to 20-30 ft. tall. Noted for its stunning pea-like, rose-purple flowers which bloom profusely in early spring. Flowers are followed by flattened leguminous bean-like dry seedpods that mature to brown in the summer. Does best in well-drained soils in full sun to part shade.

### Black Locust (*Robinia pseudoacacia*)

The fragrant, whitish flowers, borne in showy racemes, appear after leaf emergence in May or June. The flowers originate in the axils of current year leaves and are pollinated by insects, primarily bees. Black locust is a medium sized tree, generally 40 to 60 ft. in height. The species does best on moist, rich, loamy soils or those of limestone origin. Mid season bloom.

### American Plum (*Prunus americana*)

Its white, pungently sweet blossoms emerge in early spring before the foliage breaks bud. It is very adaptable to a wide variety of environmental conditions and needs full sun. Can reach a mature height of 20 ft. and mature spread of 25 ft.

### Sourwood (*Oxydendrum arboreum*)

This small, native tree has a mature height of 25-30 ft. Small, creamy-white, urn-shaped, fragrant flowers are borne in 4-10 inch long panicles in June to early July. The rich, iridescent green leaves turn vibrant yellow, purple, and red in fall. The sourwood grows in acidic, loamy, moist, sandy, well-drained, or clay soils. Prefers full sun and normal moisture but has some drought tolerance. Excellent native ornamental tree with four season attributes. Late season bloom.

### Tulip (Yellow) Poplar (*Liriodendron tulipifera*)

A fast-growing tree, at maturity this species can reach a height of 80 ft. with a spread of 40 ft. Flowering in late May/early June, it has the largest solitary flower of any native tree in Ohio. It is characterized by six petals that are yellow-green on the outside, and orange-yellow on the inside. It grows in full sun to partial sun and prefers moist but well-drained, slightly acidic, deep, rich soil but can adapt to other soil conditions. Early/Mid season bloom.

## Weed Wand Magic - \$27

No spray, no drift, no waste! Ideal for quick, easy and targeted spot application of herbicide directly on weeds or stumps. Lightweight design prevents the need to bend over - simply push down on the tube to apply the desired amount of herbicide. Each wand comes with a three pack of replacement tips.

## Plantskydd (Spray & Powder)

100% organic, safe for use in protecting flowers, ornamentals, seedlings, shrubs, and trees, as well as fruit, vegetables, and other food crops against browse damage from deer and rabbits. Won't harm the environment or pets. It is non-toxic, biodegradable, and also acts as a fertilizer. Available in 1 quart ready to spray bottle or 2.2 lb. soluble powder concentrate (makes 10 quarts of liquid for spraying).  
**Spray \$22 and Powder \$49**

## How to Order

Complete order form found in brochure, on website ([www.pickawayswcd.org](http://www.pickawayswcd.org)), in January newsletter, or in office.

We accept Cash or Check made payable to *Pickaway SWCD*. If you include your email on the order form, a confirmation email and copy of your receipt will be emailed to you. Hard copies of all receipts will be given at pick up.

Mail or drop off order form with payment to:  
**Pickaway SWCD**  
110 Island Road, Suite D  
Circleville, Ohio 43113

Pickaway SWCD Office Hours:  
Monday-Friday 8:00-4:30

Orders will be accepted through  
**February 10, 2022**

**Tentative Pick-Up Date & Location**  
April 8, 2022 from 9:00 AM - 6:00 PM  
At the garage in lower parking lot of Service Center, 160 Island Road

*A postcard will be sent to you to confirm pickup date, location and times.*

If you have any questions, please call  
**740-477-1693**

*Please note that Pickaway SWCD and several other SWCDs order all of our trees through Athens SWCD. Athens SWCD works with various greenhouses on varieties, and they are the distributor. The Athens Soil and Water Conservation District reserves the right to substitute species in the Specialty Tree Packets, Erosion Control Seed Mix and Wildlife Food Plot Seed Mix based upon availability.*

**February 10, 2022**

## Deciduous Trees

**Black Cherry** Commercially important tree growing to 60+ ft. at maturity; commonly used for lumber, veneer and furniture. Leaves are dark green in summer and yellowish in fall. Small black fruits provide food for birds and mammals. Tolerates a wide variety of growing conditions. *Black Cherry's wilted Green leaves can be poisonous to sheep, goats, cattle and horses.* **25/\$20**

**Black Walnut** This large nut tree, reaching up to 75 ft. at maturity, is valued for timber, veneer and furniture. It has dark green compound leaves and produces delicious nuts, utilized by wildlife. Grows well in most locations, but prefers fertile, deep soils. **25/\$20**

**Northern Red Oak** Tall, relatively fast growing tree, reaching 80+ ft. at maturity. Leaves are shiny green in summer and bright red in fall. An excellent tree for street or yard. Prefers full sun and acidic soil. It has a commercial value for furniture and lumber. Plant 15-39 ft. apart. **25/\$20**

**Sugar Maple** This large shade tree can reach heights over 100 ft. It is the cornerstone of the maple syrup industry. The medium green leaves can turn brilliant yellow, orange or red in the fall. Prefers partial to full sun and well-drained soil. Excellent shade tree. **25/\$25**

**White Oak** A large, broadleaf tree growing to 100+ ft. This species is shade tolerant, found on a variety of sites and grows best in deep, sandy loam soil on south and west-facing slopes. A great species for wildlife. **25/\$20**

### SEEDLING SIZE:

**TREE AND SHRUB SEEDLINGS SHOULD BE: BETWEEN 6 AND 18 INCHES TALL, DEPENDING ON THE SPECIES. SEEDLINGS SHOULD BE PLANTED WITHIN 5 DAYS AFTER PICK-UP AND THEN WATERED REGULARLY.**

## Groundcover

**Wild Ginger** (*Asarum canadensis*) Native spring wildflower usually grown in woodland gardens, native plant gardens or used as edging in landscapes. Easily grown in a variety of soil types in part shade to full shade. Spreads slowly by rhizomes. Height is 4-8 inches at maturity. Plant 8-12 inches apart. 25 bulbs per packet - **\$25**

**Partridge Berry** (*Mitchella reptans*) A mat-forming, evergreen groundcover that displays interesting foliage, flowers and fruit. Tolerates heavy shade and dry conditions. Height is 2 inches at maturity. Plant 8-12 inches apart. 25 bulbs per packet - **\$25**

## Wildlife Boxes - \$30

### Bat House

Bats play an essential role in keeping populations of night-flying insects in balance. One bat can catch hundreds insects per hour! They are primary predators of beetles, moths, leafhoppers, mosquitoes and other insects. Installing this cedar bat house on your property will provide roosting locations for these nocturnal mammals.

### Eastern Bluebird Box

Landlords wanted! Attract bluebirds to your property! Bluebirds readily accept nesting boxes to raise their young. Ideal bluebird habitat is mix of scattered trees and open grasslands, including short, mowed or grazed grass. These cedar nest boxes should be placed at least 300 ft. apart.

## Conifer Trees

**Eastern Redcedar** This medium growing species makes an excellent windbreak while its aromatic heartwood is prized for making chests, wood lining, shavings, small carvings, pencils, and non-rotting fence posts. Reaching a height of 30 ft. and spread of 15 ft., it tolerates about any type of soil and does well in full to partial sun conditions. Should not be planted near apple trees due to cedar-apple rust. **25/\$20**

**Eastern White Pine** An outstanding timber pine due to its large size (80+ ft.) and fast growing ability. It has long, soft, light green needles and grows well in many soil types. Often used for windbreaks, wildlife habitat (provides excellent nesting cover), lumber and Christmas trees. Prefers full sun, but can tolerate some shade. Not salt tolerant. **25/\$20**

**Norway Spruce** (*Picea abies*) One of the fastest growing spruces, reaching 100 ft. at maturity. An extremely attractive evergreen with strong, distinctive, sweeping branches and shiny green 1/2" to 1" long, flat needles. Grows well on most sites and is used for ornamentals, windbreaks and Christmas trees. **25/\$20**

**Virginia Pine** A small to medium sized tree reaching up to 70 ft. in height. It grows best in sites with full sun, well-drained soil, and sandy acidic loam. It has a slow growth rate and is moderately pollution tolerant for a pine. It will grow in poor, dry soils, including clay soils. The seeds are a food source for many birds and it is resistant to damage by deer. **25/\$20**

**Bald Cypress** Large, slow-growing, long-lived, deciduous conifer. Frequently reaches 100-120 ft. in height and 3-6 ft. in diameter. The leaves are alternate, linear and flat with blades generally spreading around the twig. Prefers very wet soils consisting of muck, clay or fine sand where moisture is abundant and fairly permanent. Excellent for erosion control, timber, wildlife, and site rehabilitation. **25/\$20**

## Seed Mixes

**FOR MORE INFORMATION ON THE INDIVIDUAL SEED MIXES  
VIST OUR WEBSITE AT [www.pickawayswcd.org](http://www.pickawayswcd.org).**

**Erosion Control Seed Mix** A blend of Birdsfoot Trefoil, Timothy, Tall Fescue, Annual Ryegrass, Alsike Clover and Red Top. Excellent substitute for crownvetch. For severe erosion control measures. Covers 200 sq. ft. **2 lb. bag - \$16**

**Showy Northeast Native Wildflower & Grass Seed Mix** A mix of native wildflowers and prairie grasses that will provide a wonderful display of color from spring through summer. This full sun/part shade mixture contains drought resistant species that attain an average height of 2-3 ft. Excellent for native meadows and wildflower patches. Covers 200 sq. ft. **1 oz. packet - \$6**

**Whitetail 365 Food Plot Seed Mix** This "throw & go" mix can be planted anytime from early spring through late fall. The combination of oats, rye, and 2 varieties of peas ensures that something is always growing and providing forage for deer year-round. Covers 1/2 acre. **25 lb. bag - \$55.00**

## Tree Marking Flags

30 inch high metal stakes with a 4x5 inch pink or orange flag. Perfect for marking those newly planted trees, shrubs, and groundcover. \$0.10 each or 100 for \$10

## Edibles Packet - \$12

(2 each of the following species - 10 seedlings total - No Substitutions)

### American Elderberry (*Sambucus canadensis*)

This deciduous shrub reaches a height and spread of 5-12 ft. and has white blooms from June to July. Grows in medium to wet, well-drained soils in full sun to part shade. Tolerates a wide range of soils, but prefers moist, humusy ones. Spreads by root suckers to form colonies. Fruits attractive to wildlife and can be used to make jams, jellies, pie fillings, and wine. Attracts birds and butterflies.

### Butternut (*Juglans cinerea*)

Also known as white walnut, this slow growing tree reaches a height of 60 ft. and spread of 50 ft. Prefers deep, moist, rich, well-drained soils under sunny conditions, especially the bottomlands of rivers and creeks. A sweet and very oily nut and ideal for topping desserts and salads. Male and female flowers of Butternut occur on the same tree.

### PawPaw (*Asimina triloba*)

This small tree can form small colonies under natural conditions. Grows to both a height and spread of 15-20 ft. Leaves turn from dark green in summer to yellow in fall. Flavor and fleshy consistency of the large, sweet-flavored, edible fruits resembles bananas and can be eaten fresh or used in a variety of dishes. Fruit is consumed by a variety of animals. Easily grown in average, medium to wet, well-drained soil in full sun to part shade but prefers moist, fertile soil and full sun.

### Hazelnut (*Corylus americana*)

This nut-producing shrub grows to a height of 15-18 ft. and a spread of 10-12 ft. with a medium to fast growth rate. It takes on a multi-stemmed form with an open, wide-spreading base. Full sun and partial shade are preferable - a minimum of 4 hours of direct, unfiltered sunlight each day. The hazelnut grows in acidic, alkaline, loamy, moist, rich, sandy, well drained, and clay soils and is drought-tolerant. Should be planted in multiples (2 or 3) to ensure cross-pollination. Nuts eaten by squirrels, deer, turkey, woodpeckers, pheasants, grouse, quail, & jays.

### Persimmon (*Diospyros virginiana*)

Adaptable to a variety of soil, moisture, and polluted conditions. Prefers moist, well-drained, average soils of various pH's, but easily adapts to poor, rocky, clay, sandy, or even organic soils of dry or moist constitution. Will not tolerate wet sites and needs full to partial sun. Slow to medium growing tree, it can reach a height of 50 ft. and spread of 30 ft. Primarily a dioecious species, having male and female flowers on separate trees. This tree produces a yellow flower in late spring and early summer. Persimmons are often pureed or baked into goods, but they're also delicious raw.

## Fruits and Mushrooms

**Dwarf Bartlett Pear** (2 trees) Bartlett pear is one of the most well known pear tree varieties. They are extremely productive. Bartlett pears produce extremely juicy and sweet pears early in their growing cycle. Bartlett pear trees are considered self pollinating. These dwarf varieties will ultimately have a height and spread of about 10 ft. They grow best in full sun and moist, well-drained soils. Neither species is drought tolerant. **2/\$27**

**Shiitake Mushroom** (1 kit) Delicious mushrooms that have brown, slightly convex caps that range from about 2-4 inches in diameter. Kit contains 200 inoculated shiitake dowel plugs, 1/4lb. bees wax, wax dauber, 5 metal tags for labeling and an easy to follow growers guide. Each kit will plug approximately 10 logs 3 inches in diameter and 40 inches long. Logs not included. **\$27**
